Subject: Meeting with Christine regarding PCW, NWEA's letters and CZARA

Teresa,

My meeting with Christine just got moved from 8:30 to noon tomorrow. Depending on when this gets over, I will try to join you at the BLM.

In response to BLM's question, the items I have identified as of key interest to EPA, from my perspective, include grazing, minerals, sustainable energy, NSO and MM, survey and manage, trails and travel management, fisheries, hydrology, fire and fuels, soil, invasive species, air quality, climate change, ACECs, and tribal resources. I will bring my forms with me tomorrow.

Thanks for participating in yesterday's discussion. I do want to talk more with you about key points made by ODF regarding their concerns with our CZARA decision.

Safe travels tomorrow.

Alan
